Experiential Learning Program (ELP) with Industry Internship - 2026

PLANTICA Student Exchange Program and Industry Internship Opportunity

The PLANTICA Student Exchange Program and Industry Internship Opportunity is a structured experiential learning initiative designed to bridge the gap between academic learning and industry requirements in agriculture, horticulture, and biological sciences. The program offers final-year undergraduate students an opportunity to gain hands-on exposure, industry-oriented skills, and professional mentoring for a duration of one to three months. Through collaborations with agri-industries, research organizations, startups, NGOs, and academic partners, PLANTICA aims to enhance employability, innovation capacity, and entrepreneurial orientation among students.

PLANTICA Student Exchange and Experiential Learning Program (ELP) with Industry Internship - 2026

Objectives of the Program

- To provide practical industrial exposure to final-year undergraduate students.
- To enhance employability, technical competence, and professional skills.
